Free multiplication and division worksheets grade 4

Add Addition, Multiplication and Division Worksheets Welcome to our 4th Grade Math Worksheets area. Here you'll find a wide range of free printable fourth grade math worksheets, and math activities your child will enjoy. Take a look at our decimal value sheets, our mental math sheets or maybe some of our equivalent fraction worksheets. Maybe you'd prefer our statistics worksheets or how to measure angles? This page contains links to other Math web pages where you will find a number of activities and resources. If you can't find what you're looking for, try searching the site using the Google search box at the top of each page. These are the standards for the end of the year for the 4th Grade.

Understand and use a place value of up to 1 million. Read and write multi-digit integers using base-ten numbers, number names, and expanded form Use the place value to round any integer anywhere. Find pairs of factors for any integer up to 100. Find out if any number up to 100 is prime or compound. Generate a shape or number pattern that follows a rule. Seamlessly add and subtract multi-digit numbers using the standard algorithm. Multiply an integer with up to 4 digits by a single digit number. Multiply two 2-digit numbers. Find quotients and remaining integers with dividends up to 4 digits and 1-digit dividers. Solve multi-step word problems with integers and have integer answers Compare two fractions with different denominators and different numerators. Explain why a fraction (a/b) is equivalent to a fraction $(n \times a) / (n \times b)$ using visual models Break down a non-unit fraction in the sum of fractions with the same denominator in different ways. Add and subtract mixed numbers with similar denominators. Understand fraction a/b as a multiple of fraction $1/b$ Multiply a fraction by an integer. Express a fraction with a denominator of 10 as an equivalent fraction with a denominator of 100. Use the above fact to add two fractions with denominators of 10 and 100 together. Convert fractions with denominators of 10 or 100 into decimals and back into fractions. Resolve measurement issues that involve converting a larger drive into a smaller drive. Convert measurements from one unit to another. Use all 4 operations to solve word problems that involve a number of different measures. Create a plot line to display a set of unit data in unit fractions. Understand what an angle is. Measure and draw an angle accurately using a conveyor. Solve addition and subtraction problems to find angles Draw and recognize points, lines, line segments, rays, angles (right, sharp, obtuse) and perpendicular and parallel lines. Recognize and draw lines of symmetry in 2D shapes and figures. Classify shapes in several ways using their properties. Apply the area and perimeter formulas for rectangles. On this page you will find a link to our range of math worksheets for 4th grade. Using these 4th grade math worksheets will help your child Understand decimals; Use position value notation with tenths and hundredths; Know how to read and write numbers at 10 million; Understand the value of 10 million. Using these 4th grade math worksheets will help your child: learn to estimate and approach; order numbers, including negative and decimal numbers; learn how to place decimal numbers on a number line; understand and use multiples and factors, and know what a prime number is; complete the missing number to balance a mathematical equation. Using these sheets will support your child to: count on and come back by multiples of 10; fill in the missing numbers in sequences; count and return to negative numbers. Counting on multiples of 10 worksheets Here you will find a range of 4th grade questionnaires of printable mental math for your child to enjoy. Each quiz tests children on a variety of mathematical topics, from numerical facts and mental arithmetic to geometry, fraction, and measures questions. A great way to review topics, or use it as a weekly math test or math contest! Mental Math Worksheets 4th Grade Top page Using these 4th grade math worksheets will help your child: add multiple numbers in columns up to 5 digits; add numbers in columns, including amounts of money with up to two decimal places. Top of the page Using these 4th grade math worksheets will help your child: learn how to subtract numbers with up to 5 digits; learn how to subtract numbers that involve money with decimals with up to two decimal places. Top of the page Using these 4th grade math worksheets will help your child: use his knowledge of the multiplication table to multiply by 10s and 100s mentally multiply any integer by a single digit; multiply a two- or three-digit number by a two-digit number. Top of the page Using these 4th grade math worksheets will help your child learn to: apply your split facts up to 10x10 to answer related questions involving 10s and 100s. Divide any whole number by a single digit. Top page Using these 4th grade math worksheets will help your child: apply his addition, subtraction, and problem-solving skills; apply your knowledge of rounding and placement value; solve a number of real-life problems; attempted more difficult problems. Using the problems in this section will help your child develop his problem-solving and reasoning skills. Top of the page Using these 4th grade math worksheets will help your child: place different fractions on a number line; understand equivalent fractions; understand what a mixed number is; compare two or more fractions; convert fractions into decimals and decimals into fractions. Top of the page Using these sheets will help you: sort angles - sharp, obtuse, right, reflection, straight; classify triangles - sharp, obtuse, right; measure angles using a conveyor; know that angles in a triangle add up to 180o graph and write coordinates in the first quadrant. Top of the Page Using these sheets will help your child understand how: read the scales in both the standard and the metric metric read a scale up a range of fractions: halves, quarters and eighths; read a scale that goes up in tenths, fives, tens, fifty-hundreds. Using these 4th grade math worksheets will help your child: understand the area and perimeter; learn how to find the area and perimeter of rectangles and straight shapes. On this website, you will find our 4th grade Money Challenges. These challenges involve solving money problems and are a great way for kids to develop their reasoning and problem-solving skills while practicing their counting money at the same time. Using the leaves in this section will help your child: indicate the time at the nearest minute; familiarize yourself with digital and analog times; add and subtract time intervals. Grade 4 telling time worksheets (1 minute intervals) On this website there is a selection of 24-hour printable conversion worksheets (military time) that will help you learn to convert from 24 hours clock to 12 standard hours, and standard time to 24 hours. 24-Hour Clock Conversion Worksheets These sheets will help you learn how to add and subtract hours and minutes from hours, as well as craft a range of time intervals. Add and subtract time worksheets Here you will find our selection of most difficult time puzzles. Time Worksheets - Puzzles (harder) Top of the page Using these 4th grade math worksheets will help you: draw and read bar charts with increasingly complex numbers; read, interpret and draw line charts; find the average of up to 5 numbers; find a missing data point when the average is given. find the median of a dataset. Top of Page Puzzles will help your child practice and apply his addition, subtraction, multiplication and division facts, as well as develop his thinking and reasoning skills in a fun and engaging way. Above the page For those of you who have unexpectedly met at home with children and need some emergency activities, we have developed some math grip packs. Each grip pack is a collection of 10 worksheets covering a variety of mathematical themes (plus a game in some of the packs). They're completely FREE - check it out! 4th grade math capture packs How to print or save these sheets Need help with printing or saving? Follow these 3 simple steps to get your printed worksheets perfectly! How to print or save these sheets Need help with printing or saving? Follow these 3 simple steps to get your printed worksheets perfectly! Mathematics Salamanders expect you to enjoy using these free printable math worksheets and all of our math games and resources. We welcome any comments about our site or worksheets in the Facebook comment box at the bottom of each page. Page 2 Welcome to our 2-digit Multiplication Worksheets page. We have a lot of worksheets on this page to help you practice the skills of multiplying 2-digit numbers by 1 or 2 digits. We have divided the worksheets on this page into two sections: 2-digit multiplication x 1 digit (3rd degree) 2-digit multiplication x 2 digits digits each section ends with some more complicated challenge sheets for the most capable students. Within each section, the leaves are carefully qualified with the easiest leaves first. These leaves are intended for 3rd graders. Leaves 1 to 4 consist of 15 problems; Leaves 5 and 6 consist of 20 problems. Sheets 1 and 2 involve multiplying 2-digit numbers by 2, 3, 4, or 5. Sheets 3 through 6 involve multiplying a 2-digit number by single-digit numbers and finding products that are becoming more complicated. These 2-digit multiplication worksheets are designed for more capable students who need that extra challenge! These leaves are intended for 4th graders. Sheet 1 involves a 2-digit multiplication by 2 digits with smaller numbers and responses up to 1000. Sheets 2 through 4 have more difficult-to-multiply 2-digit numbers and responses that are generally greater than 1000. These 2-digit multiplication worksheets are designed for more capable students who need that extra challenge! We have more 2-digit multiplication worksheets, including 2-digit x 3-digit multiplication issues on this page. More Double Digit Multiplication Worksheets (harder) Take a look at some of our worksheets similar to these. Need to create your own long or short multiplication worksheets quickly and easily? Our multiplication worksheet generator will allow you to create your own custom worksheets to print, with answers. Here you will find a range of multiplication worksheets to help you be more fluid and accurate with your tables. Using these sheets will help your child: learn his multiplication tables up to 10 x 10; understand and use different multiplication models; solve a number of multiplication problems. All free 3rd Grade Math Worksheets in this section are reported by Elementary Mathematics Reference Points for 3rd Grade. Here you will find a range of Free Printable Multiplication Games to help kids learn their multiplication facts. Using these games will help your child learn his multiplication facts at 5x5 or 10x10, and also develop his memory and strategic thinking skills. Multiplication Math Games How to print or save these sheets Need help with printing or saving? Follow these 3 simple steps to get your printed worksheets perfectly!
